

Project Estimate and Pricing Sheet

Custom CERA Medical commerce, research lead system, CRM and first-release automation

Commercial recommendation Recommended client price: PKR 4,250,000 excluding applicable taxes and third-party vendor charges. This is a fixed-price first release, not a generic website quote: it includes the custom product and order workflow, research qualification funnel, unified CRM records, critical automation, measurement and production launch work described in the blueprint.

Included first release

Workstream	Included deliverables	Price PKR
Discovery and solution design	Requirements workshops, existing-system assessment, final flows, technical design, analytics map and delivery backlog.	400,000
Conversion foundation	New dual-path information architecture, homepage, four research-service pages, qualified proposal form, publication/team/facility structures, technical SEO and tracking baseline.	900,000
Custom commerce core	Catalogue, product pages, variants, inventory, cart, guest checkout, one payment-provider integration, shipping logic, order lifecycle, invoices and customer order tracking.	1,600,000
CRM and automation core	Unified records, research pipeline, assignment/tasks, source attribution, acknowledgement, proposal follow-up, cart recovery, post-purchase and reorder flows.	800,000
QA, launch and handover	Security, performance and accessibility checks; production deployment; backup/restore test; training; technical handover and 45-day defect warranty.	550,000
Total fixed project fee	First-release scope only	4,250,000

Payment milestones

Milestone	Acceptance basis	Amount PKR
1. Start and discovery	Agreement signed, access received and discovery schedule confirmed.	1,062,500 (25%)
2. Conversion foundation	Approved information architecture, research pages/forms, CRM intake and measurement baseline on staging.	1,062,500 (25%)
3. Commerce acceptance	Catalogue, cart, checkout, order workflow and one payment/shipping flow pass agreed UAT on staging.	1,275,000 (30%)

Milestone	Acceptance basis	Amount PKR
4. Go-live and handover	Production launch, critical acceptance tests passed, documentation and administrator training delivered.	850,000 (20%)

Scope assumptions

- One responsive public website, one custom administration area and a first-release CRM; English-first content. Urdu, additional languages and native mobile apps are excluded.
- Up to 40 initial products, four core research-service pages and one approved visual direction. Additional catalogue migration is billed after the included limit.
- One payment gateway, one courier/shipping integration, one transactional email provider and WhatsApp integration only where CERA has the required commercial account and approvals.
- CERA provides final product data, pricing, stock, approved claims/warnings, photography, publications, team credentials, policies and authorized evidence. Scientific/legal review remains CERA's responsibility.
- Includes a 45-day defect warranty after launch. Continuous operations, content production, paid media, SEO retainers and feature changes are separate services.

Excluded and variable costs

Item	Commercial treatment
Cloud hosting, object storage, email, domains, SMS, WhatsApp, payment processing and courier charges	Paid directly by CERA to vendor. Baseline infrastructure is estimated at PKR 22,700-32,700/month before usage-based services.
Paid advertising spend, creative production and influencer work	Not included; requires a separate media plan and regulatory/claim approval.
DRAP/legal advice, product classification, advertisement approval, privacy/legal drafting	Not included. Specialist review is a pre-launch dependency for relevant therapeutic claims.
Additional gateways/couriers, wholesale portal, subscriptions, loyalty/referrals, advanced BI or AI assistants	Phase 2 change order after measured launch data; budget separately.
Change requests after scope lock	Quoted against a blended rate of PKR 22,000 per approved person-day, with a written impact on timing.

Market position

Published 2026 Pakistan references show ordinary ecommerce packages in the low hundreds of thousands of PKR and entry custom web applications around PKR 600,000. Those packages do not equal CERA's scope: regulated product-content controls, custom checkout/order operations, research-file intake, a B2B opportunity pipeline, automation, security hardening, analytics and formal handover materially increase both effort and accountability. The recommended price is therefore positioned as a serious custom build, not a template-store quotation.

Sources and planning notes

Provider prices are current web-published references checked in September 2026. PKR figures that depend on USD are planning estimates at PKR 300 per USD, excluding bank conversion charges, sales tax and future provider price changes.
